Thanks for choosing the Electric scooter !

Thanks for choosing the Electric scooter

Your Electric scooter is a recreational product with mobile app ,allowing you to connect with other riders Enjoy your ride and connect with riders worldwide

1 Riding Safety

1. The Electric scooter is a recreational product. Before mastering riding skills you need to be responsible for any injuries or damage caused by a rider's inexperience or failure to follow the instructions in this document.

2. Please understand that you can reduce the risk by following all the instructions and warnings in this manual, but you cannot eliminate all the risks. Remember that whenever you ride the Electric scooter you risk injury from loss of control, collisions, and falls. When entering into public spaces always comply with the local laws and regulations. As with other vehicles, faster speeds require longer braking distance. Sudden braking on low traction surfaces could lead to wheel slip or falls. Be cautious and always keep a safe distance between you and other people or vehicles when riding. Be alert and slow down when entering unfamiliar areas.

3. Always wear a helmet when riding. Use an approved bicycle or skateboard helmet that fits properly with the chin strap in place and provides protection for the back of your head.

4. Do not attempt your first ride in any area where you might encounter children, pedestrians, pets, vehicles, bicycles, or other obstacles and potential hazards.

5. Respect pedestrians by always yielding the right of way. Pass on the left whenever possible. When approaching a pedestrian from the front, stay to the right and slow down. Avoid startling pedestrians. When

approaching from behind announce yourself and slow down to walking speed when passing. Please obey local traffic laws and regulations if situation is different.

6. In places without laws comply with the safety guidelines outlined in this manual user is responsible for any property damage ,personal injury/death,accidents,or legal disputes caused by violations of the safety Instructions.

7. Do not allow anyone to ride your Electric scooter on his/her own unless they have carefully read this manual and followed the New Rider Tutorial in the App.The safety of new riders is your responsibility.Assist new riders until they are comfortable with the basic operation of the Electric scooter ,Make sure each new rider wears a helmet and other protective gear .

8. Before each ride check for loose fasteners and damaged components. If the Electric scooter makes abnormal sounds or signals an alarm,immediately stop riding Diagnose your Electric scooter call your dealer/distributor for service.

9.Be alert! Scan both far ahead and in front of your Electric scooter-your eyes are your best tool for safely avoiding obstacles and low traction surfaces(including but not limited to,wet ground,loose sand.loose gravel,and ice).

10.To reduce risk of injury. you must read and follow all"CAUTION and WARNING notices in this document.Do not ride at an unsafe speed. Under no circumstance should you ride on roads with motor vehicles.The manufacturer recommends riders be 16+ year sold.Always

follow these safety instructions.

A. People who should not ride the Electric Scooter include

- i. Anyone under the influence of alcohol or drugs
- i. Anyone who suffers from disease that puts them at risk if they engage in strenuous physical activity
- ii. Anyone who has problems with balance or with motor skills that would interfere with their ability to maintain balance
- v. Anyone whose weight is outside the stated limits (Maximum bearing weight 100kg)

Vi. Pregnant women

B. Riders under the age of 18 years old should ride under adult supervision

C. Comply with local laws and regulations when riding this product. Do not ride where prohibited by local laws

D. To ride safely, you must be able to clearly see what is in front of you and you must be clearly visible to others

E. Do not ride in the snow, in the rain, or on roads which are wet, muddy, icy, or that are slippery for any reason

Do not ride over obstacles (sand, loose gravel, or sticks). Doing so could result in a loss of balance or traction and could cause a fall

11. Do not attempt to charge your Electric scooter if, the charger, or the power outlet is wet

12. As with any electronic device, use a surge protector when charging to help protect your Electric scooter from damage due to power surges and voltage spikes. Only use only the matching charger in the vehicle package. Do not use a charger from any other different product models

13. Use only approved parts and accessories. Do not modify your Electric scooter. Modifications to your Electric scooter could interfere with the operation of the Electric scooter, could result in serious injury and/or damage, and could void the Limited Warranty.

2 Packing List

Assembled Electric Scooter

User Manual x1

tool kit x1

Headlamp gasket x1

Hook x1

Charger x1

When unpacking your Electric scooter. Please verify that the above items are included in the package. WEEE Disposal and Recycles Information Correct Disposal of this product. This marking indicates that this product should not be disposed with other household wastes throughout the EU.

To prevent possible harm to the environment or human health from uncontrolled waste disposal, it is responsible to promote the sustainable reuse of materials resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environmental safe recycling.

Battery recycling information for the European Union

Batteries or packaging for batteries are labeled in accordance with European Directive 2006/66/EC and amendment 2013/56/EU concerning batteries and accumulators and waste batteries and accumulators. The Directive determines the framework for the return and recycling of used batteries and accumulators as applicable throughout the European Union. This label is applied to various batteries to indicate that the battery is not to be thrown away, but rather reclaimed upon end of life per this Directive.

In accordance with the European Directive 2006/66/EC and amendment 2013/56/EU, batteries and accumulators are labeled to indicate that they are to be collected separately and recycled at end of life. The label on the battery may also include a chemical symbol for the metal concerned in the battery (Pb for lead, Hg for mercury and Cd for cadmium)

Users of batteries and accumulators must not dispose of batteries and accumulators as unsorted municipal waste, but use the collection framework available to customers for the return, recycling, and treatment of batteries and accumulators. Customer participation is important to minimize any potential effects of batteries and accumulators at the environment and human health due to the potential presence of hazardous substances

Before placing electrical and electronic equipment (EEE) in the waste collection stream or in waste collection facilities, the end user of equipment containing batteries and/or accumulators must remove those batteries and accumulators for separate collection.
